PROFESSIONAL SUMMARY

Software developer with 4+ years of experience building web applications, internal business systems, APIs, integrations, SQL databases, ERP/Odoo modules, and mobile solutions connected to real operational workflows. My profile combines fullstack development, backend engineering, systems analysis, and the ability to understand business needs and turn them into useful, maintainable software.

I work across the full delivery cycle: requirements gathering, functional analysis, data design, frontend/backend development, system integration, testing, documentation, user support, maintenance, and continuous improvement.

Web DevelopmentFullstackBackendREST APIsJavaScriptNode.jsPythonPHPSQLPostgreSQLMySQLOdoo ERPFlutterGitSystems AnalysisAutomation

CORE COMPETENCIES

Web and fullstack development - Complete web applications with frontend, backend, and databases. - Responsive interfaces with HTML, CSS, JavaScript, and Bootstrap. - Features for users, internal processes, and daily operations.	Backend, APIs, and data - Business logic, services, REST APIs, and system integrations. - Work with Node.js, Python, PHP, SQL, PostgreSQL, and MySQL. - Database design, queries, maintenance, and improvement.
ERP, Odoo, and integrations - Odoo ERP customization with Python and XML. - Automation of administrative and operational processes. - Odoo integration with APIs, devices, and external applications.	Analysis and quality - Requirements gathering, documentation, and user support. - Scrum, Kanban, Git, code review, Clean Code, SOLID, and OOP. - AI-assisted development for coding, debugging, and documentation.

WORK EXPERIENCE

Fullstack Developer - BMI Constructora - Develop, maintain, and integrate internal solutions for operations, resource management, projects, and administration. - Implement and customize Odoo ERP modules using Python and XML, adapting workflows to specific business needs. - Build APIs to connect Odoo with facial recognition devices and an internal mobile application. - Designed and developed a corporate mobile app for resource management and team coordination, integrated with Odoo through a custom API. - Develop internal web applications and responsive interfaces using JavaScript, HTML, CSS, and Bootstrap. - Work with SQL databases connected to business systems, including queries, maintenance, data structures, and reporting support. - Automate administrative and operational processes to reduce manual work and improve traceability. - Gather user needs, translate requirements into features, document workflows, and fix issues in internal systems.	February 2024 - Present
Freelance Software Developer - Develop and maintain custom web solutions for clients, combining frontend, backend, and databases. - Build features with HTML, CSS, JavaScript, PHP, Python, Node.js, and SQL according to project needs. - Gather requirements, propose practical technical solutions, and support the full delivery cycle. - Deliver improvements, bug fixes, post-delivery support, and adjustments based on user feedback. - Configure basic server environments, databases, and deployments to keep applications running in production. - Create technical documentation, product manuals, and usage guides to support solution adoption.	January 2022 - Present

FEATURED PROJECTS

Mobile Resource Management System Internal mobile app integrated with Odoo for resource coordination, task tracking, and operational data synchronization. Stack: Flutter, REST API, Odoo, PostgreSQL	Odoo Integration Suite Odoo modules and customizations for operations, inventory, HR, and project management, with external integrations. Stack: Python, XML, Odoo, SQL, APIs
Business Web Applications Complete web solutions for clients and internal teams: interfaces, backend, databases, documentation, support, and maintenance. Stack: JavaScript, Node.js, Python, PHP, PostgreSQL, MySQL	Process Automation Administrative and operational workflows automated to reduce manual work, improve traceability, and organize management data. Stack: Odoo, SQL, APIs, advanced Excel

TECHNOLOGIES

Languages: JavaScript, Python, PHP, SQL, HTML, CSS, XML	Backend: Node.js, Flask, Laravel, REST APIs, business logic
Frontend: HTML5, CSS3, JavaScript, Bootstrap, responsive design	Databases: PostgreSQL, MySQL, schema design, queries
ERP/Mobile: Odoo, Python/XML, Flutter, mobile-backend integration	Tools: Git, GitHub, Linux, advanced Excel, ChatGPT, Claude, Copilot, Cursor

EDUCATION

Bachelor's Degree in Technology Resource Management Universidad Gaston Dachary	In progress, June 2026
Advanced Technical Diploma in Information Systems Analysis Instituto Superior del Milagro	Completed in 2021
Technical Programming Analyst Diploma Instituto Superior del Milagro	Completed in 2021

LANGUAGES

Spanish: native **English:** intermediate, technical reading and writing **Portuguese:** A2
